

## **PHP developers – intermediate and advanced**

Learning Pool is recruiting developers for its growing technical team. This is the ideal role for someone with experience of PHP programming as a core development language as well as CSS and open source technologies. We have a number of opportunities for experienced programmers and will consider different types of commercial experience for these positions.

As an integral part of our web team you'll be involved in the development of cutting edge e-learning and social networking web applications, you'll get to work in a creative, innovative and fast paced environment and get the opportunity to prove your technical credentials every day.

Your main responsibilities will include:

- Hands-on coding in line with best practice coding standards (often to meet tight deadlines)
- Working closely with the Head of technology and technical architect to translate customer requirements (external and internal) into high quality software solutions
- Ensuring the high standard of development expected through rigorous testing
- Helping with writing specifications and estimating time required to deliver on projects
- Delivery of software using agile project methodologies

To be considered for this position you will have:

- Proven PHP development experience and debugging skills
- HTML/CSS knowledge
- Development experience on LINUX or UNIX environments highly desirable
- MySQL database development experience also highly desirable
- Experience of software testing and quality control processes
- Excellent communication skills
- Experience of developing for Wordpress or similar content management system
- Experience developing using the Moodle Learning Management System desirable
- Experience with open source technologies also desirable

Expect this role to be extremely challenging and require significant effort in terms of hours and innovation. In return we'll offer an attractive package and the chance to be a key part of one of Northern Ireland's success stories.

To apply for a role in our web team, contact [kenny@learningpool.com](mailto:kenny@learningpool.com) with a CV and a covering note explaining why you want to be considered for this opportunity.
